The Ducati Story - 6th Edition Falloon 2018-06-19 The Ducati Story is brought right up to date in this new edition of Ian Falloon authoritative book, covering the complete history of the marque. Initially under government control, Ducati went through several ups and downs, characterized by dubious managerial decisions. Held together by the great engineer Fabio Taglioni, the famed desmodromic valve gear, Ducati produced some of the finest motorcycles of the 1950s, 1960s and 1970s: the Marianna, de Mach 1, 750 and Pantah. Taglioni also instigated Ducati's return to racing, and victory in the 1972 Imola 200 was the turning point. Hailwood rode the 900 Ducati to victory in the 1978 Isle of Man Formula One race and Tony Rutter took four World TT2 Championships. Cagiva purchased Ducati in 1985, bringing a new engineer, Massimo Bordini, and new designs - most famously the Desmoquattro. In various guises, this model dominated the World Superbike Championship during the 1990s, particularly in the hands of Carl Fogarty. Landmark models included the 916 and Monster, and, with the sale of Ducati to the Texas Pacific Group in 1996, the company began to grow. The racing program expanded to MotoGP and new model families were introduced. With control taken by the Italian InvestIndustrial in 2006, Ducati embarked on the next era of development: Casey Stoner winning the MotoGP World Championship in 2007. Now under the Audi umbrella Ducati continues to thrive. This new edition includes a brand new chapter featuring all the models from 2012 up to 2018.

The Ducati 750 Bikes Falloon 2006-08-10 The Ducati 750 motorcycles were among the last pure, unadulterated sporting motorcycles built--representing a time before cost accounting and government design requirements--and have, unsurprisingly, inspired a new generation of retro classics.

Ducati Desmoquattro Superbikes Falloon 2002-06 Ducati stunned the world in 1988 when the struggling, small Italian firm unveiled its Desmoquattro -- 8-valve, desmodromic -- Superbike. The bike found success on the world's racetracks right from the start. Its versions soon carried that success to the general public, proving this design wasn't just another noisy prototype. The Superbike 851, 888, 916, and 996 -- are now Ducati's best-selling machines in the United States; and the Desmoquattro engine found success in the company's more pedestrian series such as the Monster roadster and ST4 sport-tour. This is the comprehensive volume on Desmoquattro performance motorcycles and replaces the out-of-print Ducati Super Bikes: 851, 888, 916.
