*How to Build a Cheap Hot Rod Dennis W. Parks* The ever-escalating cost of building or buying a hot rod is leaving more and more would-be hot rodders behind. This book will get those hopefuls off the sidelines by showing how a hot rod can be built for less than the cost of, say, a new Hyundai.

Author Dennis Parks documents his own project--building a quintessentially cool Model T roadster from a "Track-T" kit--showing in step-by-step detail how to turn a pile of parts into a rockin hot rod. He provides a detailed, easy-to-follow guide for building a car of your own. The advice and

instructions cover every aspect of an affordable hot rod build, from establishing the target vehicle and budget, to finding parts, building the car, and fine tuning the finished vehicle on the road. With Parks' money-saving tips and photo-supported how-to sequences, virtually anyone with minimal mechanical skills and the will to use them can be sure of building their hot rod right, and for the right price. The book also includes a full resource guide and recommendations for further reading.

When her conventional life fell apart, Jacqui Furneaux responded in a way that surprised many. Her random global wanderings for seven years, astride an apparently obsolete motorcycle, brought beauty, friendship, laughter and romance on the road; when she wasn't fending-off amorous sea-dogs or facing some other adversity with quiet courage."--

Riding in the Zone Ken Condon 2019-10-15 Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.
