*Bound for the Promised Land* Kate Clifford Larson 2009-02-19 The essential, "richly researched"\* biography of Harriet Tubman, revealing a complex woman who "led a remarkable life, one that her race, her sex, and her origins make all the more extraordinary" (\*The New York Times Book Review). Harriet Tubman is one of the giants of American history—a fearless visionary who led scores of her fellow slaves to freedom and battled courageously behind enemy lines during the Civil War. Now, in this magnificent biography, historian Kate Clifford Larson gives us a powerful, intimate, meticulously detailed portrait of Tubman and her times. Drawing from a trove of new documents and sources as well as extensive genealogical data, Larson presents Harriet Tubman as a complete human being—brilliant, shrewd, deeply religious, and passionate in her pursuit of freedom. A true American hero, Tubman was also a woman who loved, suffered, and sacrificed. Praise for *Bound for the Promised Land* "[Bound for the Promised Land] appropriately reads like fiction, for Tubman's exploits required such intelligence, physical stamina and pure fearlessness that only a very few would have even contemplated the feats that she actually undertook. . . . Larson captures Tubman's determination and seeming imperviousness to pain and suffering, coupled with an extraordinary selflessness and caring for others."—The Seattle Times "Essential for those interested in Tubman and her causes . . . Larson does an especially thorough job of . . . uncovering relevant documents, some of them long hidden by history and neglect."—The Plain Dealer "Larson has captured Harriet Tubman's clandestine nature . . . reading Ms. Larson made me wonder if Tubman is not, in fact, the greatest spy this country has ever produced."—The New York Sun

*Radar Instruction Manual United States. Maritime Administration 2005 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. *Feathers in Reverse Mbah Azonga 2014-04-02 Feathers in Reverse is the ideal gift for a loved one who is scared of poetry. It engages and immerses readers with the luring subtlety of a serpent. Themes treated include good and evil, heaven and earth, man and woman, birth and death, urbanism and rural life, wealth and poverty. As much as the poet highlights salient issues and conflicts in everyday life, he suggests answers to burning*

problems as well. A common thread runs through the over 300 poems feathered and featured in this collection. The notion of the feather is cross-cultural. It reminds us of the feather used as a pen in ancient Europe and the red feather that is stuck on the caps of African notables as a mark of distinction. *Feathers in Reverse* is a magic pudding to be sampled, shared and indulged.

*Airframes and Systems Atlantic Flight Training Ltd. 2004-01-01 Airframes & Systems, Electrics, Powerplant, and Emergency Equipment (ASEPE) - Aeroplanes, subject 021, covers a broad swathe of information that is examined in one paper. To make this information manageable, the 021 subject is broken down into three volumes; these are Airframes & Systems [which incorporates Emergency Equipment], Electrics, and Powerplant. Airframes & Systems provides a good grounding in the technical aspect of an aircraft's structure and systems, detailing, for examination purposes where required, the regulations that the student has to know and the methods by which these requirements are met. As with other subjects, there will always be areas that the student has studied that are not questioned in the exam. Learning this information is not effort wasted, as the information given within the volume provides the foundation knowledge on which the type rating course can be built.*
