How to Build a Bobber on a Budget de Miguel 2008-02-15 In the old days all a person needed to build a killer custom motorbike was a bike, a set of tools, a little know-how, and a creative vision. In this book Jose de Miguel, a custom builder from the 1960s, sets out to prove that those good old days never ended. In the clearest and simplest terms, he shows readers how they can take the ends found around the shop into one-off motorcycle parts--and make a cheap, run-of-the mill custom build into a drop-dead custom bike. Following de Miguel's lead, along with his straightforward illustrations, any resourceful owner with rudimentary mechanical skills, a basic tool kit, and--most importantly--a modicum of imagination can build the bobber of his dreams for less than the price of a new bike.
