The Way of Abundance Edith Rasell 2022-05-10 Justice, even divine justice, is concrete. It addresses flesh-and-blood persons and the systems, structures, and conditions under which they live. God's vision of abundant human living is not restricted to the spiritual realm but extends even to our material circumstances. But in today's complex economy, what specific changes to public policies and institutions could lead to a just economy? In *The Way of Abundance*, economist and minister Edith Rasell examines Old and New Testament teachings on economic justice in the context of the ancient economic systems and circumstances they addressed. Drawing on the biblical narrative and on research from the social sciences, Rasell examines three eras--the ancient Israelites' settlements in Canaan, the time of the monarchies, and first-century Palestine--and describes the transition from a non-monetized, subsistence-based economy to a commercial one with wage labor, product markets, and a surplus that benefited a tiny elite. But across this vast expanse of time and economic transition, the Bible called for a just economy. And its vision of economic justice can be a vision for justice seekers today. The book concludes with specific public policy proposals and personal practices that would move contemporary society closer to the Bible's economic vision.

The Wal-Mart Way Don Soderquist 2005-04-19 Since Sam Walton's death in 1992, Wal-Mart has gone from being the largest retailer in the world to holding the top spot on the Fortune 500 list as the largest company in the

world. Don Soderquist, who was senior vice chairman during that time, played a crucial role in that success. Sam Walton said, "I tried for almost twenty years to hire Don Soderquist . . . But when we really needed him later on, he finally joined up and made a great chief operating officer." Responsible for overseeing many of Wal-Mart's key support divisions, including real estate, human resources, information systems, logistics, legal, corporate affairs, and loss prevention, Soderquist stayed true to his Christian values as well as Wal-Mart's distinct management style. "Probably no other Wal-Mart executive since the legendary Sam Walton has come to embody the principles of the company's culture-or to represent them within the industry-as has Don Soderquist," Discount Store News once reported. In *The Wal-Mart Way*, Soderquist shares his story of helping lead a global company from being a \$43 billion company to one that would eventually exceed \$200 billion. Several books have been written about Wal-Mart's success, but none by the ones who were the actual players. It was more than "Everyday Low Prices" and distribution that catapulted the company to the top. The core values based on Judeo-Christian principles-and maintained by leaders such as Soderquist-are the real reason for Wal-Mart's success.

We Want to Do More Than Survive Bettina L. Love 2019-02-19 Winner of the 2020 Society of Professors of Education Outstanding Book Award Drawing on personal stories, research, and historical events, an esteemed educator offers a vision of educational justice inspired by the rebellious spirit and methods of abolitionists. Drawing on her life ' s work of teaching and researching in urban schools, Bettina Love persuasively argues that educators must teach students about racial violence, oppression, and how to make sustainable change in their communities through radical civic initiatives and movements. She argues that the US educational system is maintained by and profits from the suffering of children of color. Instead of trying to repair a flawed system, educational reformers offer survival tactics in the forms of test-taking skills, acronyms, grit labs, and character education, which Love calls the educational survival complex. To dismantle the educational survival complex and to achieve educational freedom—not merely reform—teachers, parents, and community leaders must approach education with the imagination, determination, boldness, and urgency of an abolitionist. Following in the tradition of activists like Ella Baker, Bayard Rustin, and Fannie Lou Hamer, *We Want to Do More Than Survive* introduces an alternative to traditional modes of educational reform and expands our ideas of civic engagement and intersectional justice.

Nickel and Dimed Barbara Ehrenreich 2010-04-01 The New York Times bestselling work of undercover reportage from our sharpest and most original social critic, with a new foreword by Matthew Desmond, author of *Evicted* Millions of Americans work full time, year round, for poverty-level wages. In 1998, Barbara Ehrenreich decided to join them. She was inspired in part by the rhetoric surrounding welfare reform, which promised that a job—any job—can be the ticket to a better life. But how does anyone survive, let alone prosper, on \$6 an hour? To find out, Ehrenreich left her home, took the cheapest lodgings she could find, and accepted whatever jobs she was offered. Moving from Florida to Maine to Minnesota, she worked as a waitress, a hotel maid, a cleaning woman, a nursing-home aide, and a Wal-Mart sales clerk. She lived in trailer parks and crumbling residential motels. Very quickly, she discovered that no job is truly "unskilled," that even the lowliest occupations require exhausting mental and muscular effort. She also learned that one job is not enough; you need at least two if you int to live indoors. *Nickel and Dimed* reveals low-rent America in all its tenacity, anxiety, and surprising generosity—a land of Big Boxes, fast food, and a thousand desperate stratagems for survival. Read it for the smoldering clarity of Ehrenreich's perspective and for a rare view of how "prosperity" looks from the bottom. And now, in a new foreword, Matthew Desmond, author of *Evicted: Poverty and Profit in the American City*, explains why, twenty years on in America, *Nickel and Dimed* is more relevant than ever.

As Dasani comes of age, New York City’s homeless crisis has exploded, deepening the chasm between rich and poor. Resetting the Table Robert Paarlberg 2021-02-02 A bold, science-based corrective to the groundswell of misinformation about food and how it's produced, examining in detail local and organic food, food companies, nutrition labeling, ethical treatment of animals, environmental impact, and every other aspect from farm to table Consumers want to know more about their food--including the farm from which it came, the chemicals used in its production, its nutritional value, how the animals were treated, and the costs to the environment. They are being told that buying organic foods, unprocessed and sourced from small local farms, is the most healthful and sustainable option. Now, Robert Paarlberg reviews the evidence and finds abundant reason to disagree. He delineates the ways in which global food markets have in fact improved our diet, and how "industrial" farming has recently turned green, thanks to GPS-guided precision methods that cut energy use and chemical pollution. He makes clear that America's serious obesity crisis does not come from farms, or from food deserts, but instead from "food swamps" created by food companies, retailers, and restaurant chains. And he explains how, though animal welfare is lagging behind, progress can be made through continued advocacy, more progressive regulations, and perhaps plant-based imitation meat. He finds solutions that can make sense for farmers and consumers alike and provides a road map through the rapidly changing worlds of food and farming, laying out a practical path to bring the two together.

Clean Disruption of Energy and Transportation Tony Seba 2014-06-27 The industrial age of energy and transportation will be over by 2030. Maybe before. Exponentially improving technologies such as solar, electric vehicles, and autonomous (self-driving) cars will disrupt and sweep away the energy and transportation industries as we know it. The same Silicon Valley ecosystem that created bit-based technologies that have disrupted atom-based industries is now creating bit- and electron-based technologies that will disrupt atom-based energy industries. Clean Disruption projections (based on technology cost curves, business model innovation as well as product innovation) show that by 2030: - All new energy will be provided by solar or wind. - All new mass-market vehicles will be electric. - All of these vehicles will be autonomous (self-driving) or semi-autonomous. - The new car market will shrink by 80%. - Even assuming that EVs don't kill the gasoline car by 2030, the self-driving car will shrink the new car market by 80%. - Gasoline will be obsolete. Nuclear is already obsolete. - Up to 80% of highways will be redundant. - Up to 80% of parking spaces will be redundant. - The concept of individual car

ownership will be obsolete. - The Car Insurance industry will be disrupted. The Stone Age did not end because we ran out of rocks. It ended because a disruptive technology ushered in the Bronze Age. The era of centralized, command-and-control, extraction-resource-based energy sources (oil, gas, coal and nuclear) will not end because we run out of petroleum, natural gas, coal, or uranium. It will end because these energy sources, the business models they employ, and the products that sustain them will be disrupted by superior technologies, product architectures, and business models. This is a technology-based disruption reminiscent of how the cell phone, Internet, and personal computer swept away industries such as landline telephony, publishing, and mainframe computers. Just like those technology disruptions flipped the architecture of information and brought abundant, cheap and participatory information, the clean disruption will flip the architecture of energy and bring abundant, cheap and participatory energy. Just like those previous technology disruptions, the Clean Disruption is inevitable and it will be swift.

Pre-Incident Indicators of Terrorist Incidents Brent L. Smith 2011-01 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. Digital Futures and the City of Today Glenda Amayo Caldwell 2016-06-01 In the contemporary city, the physical infrastructure and sensorial experiences of two millennia are now inter-woven within an invisible digital matrix. This matrix alters human perceptions of the city, informs our behaviour and increasingly influences the urban designs we ultimately inhabit. *Digital Futures and the City of Today* cuts through these issues to analyse the work of architects, designers, media specialists and a growing number of community activists, laying out a multi-faceted view of the complex integrated phenomenon of the contemporary city. Split into three sections, the book interrogates the concept of the 'smart' city, examines innovative digital projects from around the world, documents experimental visions for the future, and describes projects that engage local communities in the design process.

The Economics of Food Loss in the Produce Industry Travis Minor 2019-11-20 Food loss is a serious issue in the United States. It affects all aspects of the supply chain, from farmers to consumers. While much is already known about loss at the consumer level, our understanding of the amount of food that never makes it to this stage is more limited. *The Economics of Food Loss in the Produce Industry* focuses on the economics of food loss as they apply to on-farm produce production, and the losses that are experienced early. The book both analyses current food loss literature and presents new empirical research. It draws lessons from those who have encountered these issues by focusing on how past regional or national estimates of food loss have been conducted with varying degrees of success. It includes chapters on several themes: understanding food loss from an economic perspective; efforts to measure food loss; case studies across commodities within the produce industry; and economic risks and opportunities. The commodity case studies provide detailed discussion of factors impacting changes in loss levels within the produce industry, and a wealth of knowledge on strategies and contexts is developed. The book concludes by identifying critical knowledge gaps and establishing future priorities. This book serves as an essential reference guide for academics, researchers, students, legislative liaisons, non-profit associations, and think tank groups in agriculture and agricultural economics.

The Everything Store Brad Stone 2013-10-15 The authoritative account of the rise of Amazon and its intensely driven founder, Jeff Bezos, praised by the Seattle Times as "the definitive account of how a tech icon came to life." Amazon.com started off delivering books through the mail. But its visionary founder, Jeff Bezos, wasn't content with being a bookseller. He wanted Amazon to become the everything store, offering limitless selection and seductive convenience at disruptively low prices. To do so, he developed a corporate culture of relentless ambition and secrecy that's never been cracked. Until now. Brad Stone enjoyed unprecedented access to current and former Amazon employees and Bezos family members, giving readers the first in-depth, fly-on-the-wall account of life at Amazon. Compared to tech's other elite innovators -- Jobs, Gates, Zuckerberg -- Bezos is a private man. But he stands out for his restless pursuit of new markets, leading Amazon into risky new ventures like the Kindle and cloud computing, and transforming retail in the same way Henry Ford revolutionized manufacturing. The Everything Store is the revealing, definitive biography of the company that placed one of the first and largest bets on the Internet and forever changed the way we shop and read.

Labor Contestation at Walmart Brazil Scott B. Martin 2021-09-10 This book explores how and why the labor practices of the world ' s largest employer, supermarket giant Walmart, were contested by unions and government regulators as it expanded to Latin America starting in the 1990s. With an in-depth case study of Brazil, and a comparative chapter examining Argentina, Chile, and Mexico, this book analyzes the problematic encounter between diffusion of home-office anti-labor practices and evolving national institutional contexts that are quite

varied and in some cases enable considerable resistance by unions and/or regulators. Walmart's "repressive familial" and "anti-union" model is found to generate costs and conflicts that contributed to its unprofitability and ultimate exit from Brazil in 2018. This experience, contrasted with country situations where Walmart's overall competitive and labor and human resource practices "fit" better with national markets and institutions, underlines the brittle, problematic nature of diffusionist corporate models lacking adaptive capacity to significant cross-national variations across host countries.

Supply Chain Strategies Tony Hines 2014-01-10 *Supply Chain Strategies* demonstrates how organizations must take strategic decisions in order to manage their supply chains to sustain competitiveness in the global economy. Overcoming tensions between political, economic, technological, ethical and environmental considerations is shown to be vital to ensure a sensible strategy for managing the supply chain. Business Strategies for Sustainability Helen Borland 2018-10-03 *Business Strategies for Sustainability* brings together important research contributions that demonstrate different approaches to business strategies for sustainability. Many corporate initiatives toward what firms perceive to be sustainability are simply efficiency drives or competitive moves – falling far short of actual strategies for ecological sustainability. To suggest true ecological sustainability strategies, this new research anthology adopts an interdisciplinary, or transdisciplinary, approach to discern what business strategies might look like if they were underpinned by environmental and ecological science. The 23 chapters in this anthology reflect five main topic sections: (a) delineating sustainability challenges and visions; (b) contradiction, integration and transformation of business and sustainability logics; (c) innovating and developing strategic capabilities for sustainability; (d) assessing and valuing sustainability; and (e) toward multi-level engagement and collaboration.

White Fragility Dr. Robin DiAngelo 2018-06-26 The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this "vital, necessary, and beautiful book" (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and "allows us to understand racism as a practice not restricted to 'bad people'" (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.
